

# NeutraGas 365 ®

H<sub>2</sub>S Scavenger

## Description

---

NeutraGas 365® is a blend of revolutionary chemistries developed to neutralize H<sub>2</sub>S. It contains no triazines or amines, nor does it contain or produce any formaldehydes.

*Sizes: 20Litre, 210Litre, 1000L*

## Product Features

---

- Non-toxic to humans or aquatic life non-corrosive environmentally friendly. Contains no hazardous ingredients. Completely safe for personnel to handle and no harmful effects to the environment (biodegradable).
- Produces no precipitates-does not promote scaling at all - passes harmlessly
- through pumps and filters.
- CO<sub>2</sub> has limited effect on NeutraGas 365.
- NeutraGas 365 will also bond with/remove iron sulfide.
- Tested and approved by several refineries as an acceptable replacement for Triazines.
- Tested and approved by several pressure pumping (fracturing) companies for use with their frac fluids.
- Simple application methods - no expensive capital equipment required.
- Outperforms all other scavengers in loading efficiency. Very cost competitive option for H<sub>2</sub>S treatment.

## Applications

---

Fracking  
Scrubbers  
Abandonments  
Municipal sewage

Trucking & Haulage  
Storage Tanks  
Work overs  
Tailing Ponds

## Physical Properties

---

Appearance	Clear
Odour:	None
pH:	9.3-9.5
Specific Gravity:	1.06
Biodegradability:	Complete per OECD 301D
