

# BF-500

## Biological Floor Cleaner & Degreaser For Food Plant and Restaurant Use

- *Deep Cleaning* • *Environmentally Safe* • *Highly Effective*

### Description

---

BF-500 is a biological floor cleaner that is highly effective in penetrating porous floor surfaces to degrade and eliminate grease and other organic materials that may accumulate over time. BF-500's synergistic combination of microbial technology provides long term deep cleaning by removing embedded residual organic material found in pores, cracks, corners and crevices. BF-500 produces enzymes that are specifically selected for the breakdown of the harder to degrade fatty acid components of grease. Continual use will improve the waste stream by creating a bio-film in all of the drains used, which will reduce organic build-up in drains and enhance any biological grease trap treatment. Sizes: 4x4 litre; 20 litre; 210 litre

### Product Features

---

- Superior Deep Cleaning technology
- Eliminates grease and other organic materials
- Long term deep cleaning spores reactivated with water
- Improves waste stream
- Cleans floors and grout
- Effectively controls malodors
- Reduces conditions that would encourage pests
- Reduces slippage through the removal of grease on floors

### Applications

---

Food Plant Floors	Restaurant Kitchen Floors
Cafeterias	Grocery Stores Where Food is Prepared
Hospitals	Barns & Animal Shelter

### Physical Properties

---

Appearance:	Green Liquid
Odour:	Perfumed Scent
Bacteria Type:	Proprietary Blend of Bacillus Spores
Salmonella/Shigella:	Guaranteed free
pH :	7.5-8.5
Cleaning Ability:	Excellent
Stability:	2 Years at 2°C - 35°C
