

Selectroicide™

Chlorine Dioxide

A powerful biocide that kills Fungus, Bacteria and Viruses quickly

Description

Selectroicide™ is a new and innovative technology that allows a high level of disinfection without using expensive reactors. It is a highly effective biocide that kills Listeria, fungus, bacteria and viruses. Used in food processing plants for the removal of sludge buildup and biofilm. Generates pure Chlorine Dioxide with 0 bi-products in as fast as 30 min.

12g pouch; 2 litre pouch; 750g pouch (see label for concentrations/dilution rates)

Product Features

- No pH control required
- Health Canada Registered DIN #02302934
- 10x more effective than bleach
- No dangerous chemical by-products
- Environmentally safe
- Removes biofilm, cleans head spaces
- Rinse free
- Powder formula
- Convenient and easy to use – just add water
- Microbes do not build any resistance to it over time

Applications

Food Processing Plants
Vineyards
Breweries
Bakeries
Dairies

Hospitals
Nursing Homes
Veterinary Clinics & Kennels
Funeral Homes
Health Clubs and Spas

For use on equipment, water lines, pipes, tanks, troughs, food contact surfaces, all hard surfaces, animal carcasses, plants and vegetables.

Physical Properties

Appearance:	Powder
Chlorine Dioxide Generation	99% pure
pH (after generations) 5ppm	6.5-7
E. Coli 0157:H7	Effective Against 20ppm
Staphylococcus Aureus	Effective Against 100ppm
Effective Against:	Virucidal (Listeria)
Effective Against:	Canine Parvovirus
